# Lighting equipment and lamps - LightRec

Tariffs (21% VAT included) valid from 3 January 2007

## A. Lighting equipment

### Definition

A luminaire is an appliance in which a light source can be assembled - having as primary aim to light an object or a surrounding and, to the exclusion of light sources themselves, contains the necessary components for fixing and protecting the light sources as well as for direct or indirect connection to the mains supply.

### In addition to this definition, the following appliances fall under LightRec:

- lighting equipment using an alternative energy source such as solar energy;
- fixed appliances on batteries.

If a luminaire contains different types of lamp holders, the applicable Recupel contribution must be applied to the highest lamp holder category.

### 6.11. Luminaires for incandescent, halogen and E14-27 economy/fluorescent lamps (low or mains voltage)

€ 0.10

The illustrative list of lamp holders can be found at [www.recupel.be/bijdrage/productenlijsten](http://www.recupel.be/bijdrage/productenlijsten) via the product search system

### 6.12. Fittings for gas discharge lamps

€ 0.40

The illustrative list of lamp holders can be found at [www.recupel.be/bijdrage/productenlijsten](http://www.recupel.be/bijdrage/productenlijsten) via the product search system

### 6.13. Fittings for fluorescent lamps and LEDs

€ 0.40

The illustrative list of lamp holders can be found at [www.recupel.be/bijdrage/productenlijsten](http://www.recupel.be/bijdrage/productenlijsten) via the product search system

From this definition and product list are excluded:

- loose components which are or are not part of a lighting appliance;
- components which were not designed or produced as part of the appliance: piles, light boxes, decorative elements, etc.;
- appliances of which the primary aim is not to light an object or a surrounding, e.g. publicity lighting (posters, bus shelters, columns, etc.); equipment for road or railway signalling, incubators (broodhens);
- portable lighting equipment on batteries such as pocket torches (these fall under the BEBAT system);
- lighting equipment built into appliances that already fall under the take-back obligation of Waste Electrical and Electronic Equipment (WEEE).

## B. Gas discharge lamps

### Definition

An item that combined with a piece of lighting equipment can light an object or a surrounding and that uses electrical energy to produce light through gas discharge.

### 6.10. Gas discharge lamps

€ 0.30

#### Illustrative list

Compact fluorescent lamps and fluorescent tubes

High and low pressure gas discharge lamps

Halogen metal vapour lamps

High and low pressure sodium lamps

Mercury vapour lamps

Fluorescent lamps for sun beds

From this definition and product list are EXCLUDED:

incandescent lamps and halogen lamps that produce light by means of a filament.

\*No separate contribution is payable for gas discharge lamps that may be contained in the above-mentioned appliances when the latter are placed on the market. The existing Recupel contribution is to be considered an all-inclusive contribution.

Below you will find the rates valid **as of 3 January 2007** for medical aids and laboratory equipment. This contribution is an all-in contribution and covers both the costs for collection and processing of the discarded appliances and the costs for reporting, communication and monitoring. The contribution for testing and measuring equipment, however, is an administrative contribution. This contribution only covers the costs for reporting, communication and monitoring. Costs for collection and processing are only calculated at the time the old appliance is discarded.

An appliance can be included in this list if it is an appliance for sole professional use or because the properties of the professional appliance are such that it does not fall under the criteria of its household equivalent.

## DEFINITIONS

### Professional medical aids include the following:

All instruments, devices or appliances, all substances or all other items – not including accessories – requiring electrical power, used alone or in combination and for the following purposes:

- Diagnosis, prevention, monitoring, treatment or alleviation of illness;
- Diagnosis, prevention, monitoring, alleviation or compensation of injuries or handicaps;
- Research into or replacement/change in the anatomy of a physiological process;
- Management of fertilisation, whereby the major intended aim is not achieved through pharmacological or immunological means or through metabolism, but that can be supported by such means.

The illustrative lists can be found through the product search engine at [www.recupel.be/contribution/product lists](http://www.recupel.be/contribution/product lists)

### Professional medical aids for in-vitro diagnostics are the following:

Any medical aid – not including accessories – that is a reagent, reactive product, calibration material, monitoring material, kit, instrument, appliance, device or system used separately or in combination and that is intended by the manufacturer to be used for the in-vitro examination of specimens, including donor blood and tissue, exclusively or primarily aimed at providing information:

- about a physiological or pathological condition; or
- about a congenital defect; or
- with which the safety and degree of compatibility with potential recipient can be determined; or
- to test the effect of therapeutic measures.

The illustrative lists can be found through the product search engine at [www.recupel.be/contribution/product lists](http://www.recupel.be/contribution/product lists)

### DEFINITION

#### Professional laboratory appliances and equipment include the following:

All electrical or electronic appliances, not including accessories, used for the taking, preparation, analysis, dosage, synthesis, characterisation, identification, diagnostic analysis and quality control of samples in situ or in laboratories (such as laboratories for medical and clinical analyses, laboratories for biology and biochemistry, industrial or control laboratories, research centres, laboratories at schools of higher education/universities/ educational establishments, etc.).

Electrical and electronic products – except batteries – subjected to another return obligation (e.g., PCs or screens) and that form part of a total system are exclusively subjected to the MeLaRec contribution. In the event of finished products that are not fully and sustainably integrated, only the other Recupel contributions apply that are in force even if they are sold together or delivered at the same time.

The illustrative lists can be found through the product search engine at [www.recupel.be/contribution/product lists](http://www.recupel.be/contribution/product%20lists)
